WE'RE HERE TO ENERGIZE BUSINESS GROWTH FOR YOUR HYDROGEN OPERATIONS.

RELIABLE. ROBUST. READY.

You. Us. Together.

Your hydrogen operations are the core of your business, and we're helping more and more companies like yours reduce their business risk and increase their speed to market through our various real estate programs. We're excited to explore opportunities to partner with you on your project. Concurrently, Xcel Energy is exploring zero-carbon fuels, such as hydrogen, to move us toward 100% carbon-free by 2050.

We're proud to serve hydrogen gas manufacturing plants across our entire service territory. These partnerships reflect our customers' trust in us to deliver reliable, clean, affordable energy. Our electric services maintain 99.9% reliability, limiting costly downtime. And we can offer 100% renewable power to help you reach your sustainability goals.

Ready to grow your business? Let's build the future, together.

Power. Property. Potential. Ready to go.

We offer a deep portfolio of ready-to-develop real estate. Our sites offer convenient access to interstates and rail, as well as close proximity to our natural gas distribution system. Plus, our Certified Sites are fully documented. All required studies, done.

Experience. Expertise. Excellent support.

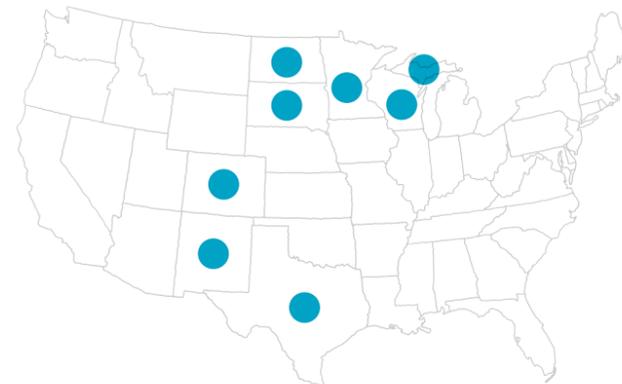

Our award-winning support team is dedicated to your business success. As a Fortune 300 company, we'll put our resources to work for you. We have highly skilled, technical expertise and extensive experience working with hydrogen gas production customers. Plus, we'll lean into our strong local relationships to help guide your project.

We also strongly believe in the value that a diverse workforce brings and the importance of having employees that reflect the communities and customers we serve.

Location. Location. Location.

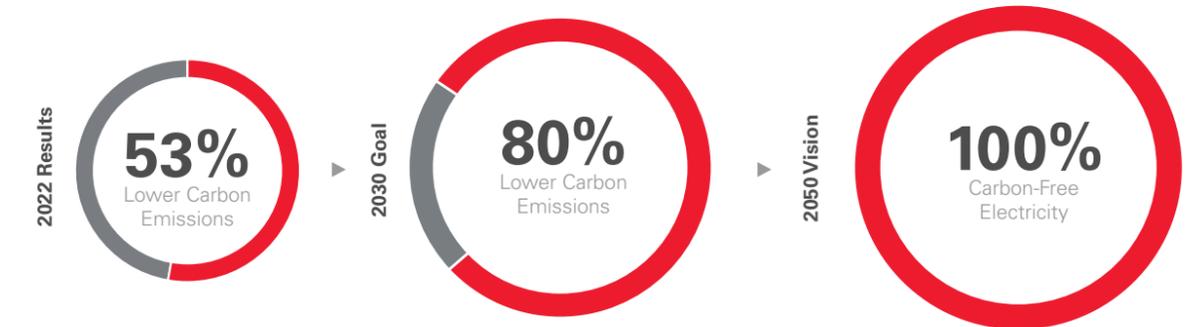

We have access to a wide range of support services and skilled talent right in our backyard. In Minneapolis/St. Paul, we're 2 million strong. In our Denver territory, 1.7 million. In New Mexico and Texas, the hydrogen industry is booming, and we can help get you there. Our eight-state territory also faces fewer natural threats, like earthquakes and hurricanes.

Where we work.

Our vision: 100% carbon-free by 2050.

We're one of the nation's top providers of clean power, and we have a vision to provide 100% carbon-free electricity by 2050 across the eight states we serve.

We also aim to provide natural gas service with net-zero emissions by 2050.

Tax rates and incentives to protect every single dollar.

In Colorado, Minnesota and Wisconsin, new or expanding projects may qualify for discounted electric pricing, which can mean more capital for your project. Our programs — from energy and process efficiency to construction design and electric rate incentives — were developed with you in mind and built to serve your business. We'll work with you to find customized energy solutions that meet your needs and protect your capital, because you're building more than a hydrogen facility — you're building your business.

We're ready to help.

We have the right home for your next project. Contact our Xcel Energy Corporate Economic Development team today. Whether you want to take a deeper dive into our operations, tour our sites virtually or in-person, or meet with state and local economic development organizations, we're here to help. You. Us. Together.
