

10/01/13

General WestGas InterState Pipeline system information:

- The pipeline design capacity for WGIS is 13,300 Dth per day.
- WGIS has one receipt point at the WGIS/Public Service Company of Colorado Chalk Bluffs Hub interconnect.
- There are two delivery points into Black Hills at the terminus of the WGIS system: Paraffin Meadows Meter Station (primary interconnect) and Chambers Camp (secondary interconnect). Firm capacity between the two points is 13,300 Dth.
- Shippers do not schedule gas to a specific Delivery Point. Therefore, for purposes of estimating available capacity for interested parties, all nominations are defined as scheduled for delivery to Paraffin Meadows, although, physically, gas may also be delivered into a combination of the two points.
- WGIS has available firm delivery capacity totaling 0 Dth per day beginning October 1, 2013 through March 31, 2014.
- WGIS currently has no scheduled/planned service outages at this time.

Parties interested in bidding on available capacity should contact Diane Christner at 303-571-7879. Written Requests for service should be mailed or faxed to the attention of Diane Christner at 303-571-7001 three business days prior to the beginning of each month.
