

IN THE MATTER OF SOUTHWESTERN  
PUBLIC SERVICE COMPANY'S  
APPLICATION REQUESTING: (1) ISSUANCE  
OF A CERTIFICATE OF PUBLIC  
CONVENIENCE AND NECESSITY  
AUTHORIZING CONSTRUCTION AND  
OPERATION OF THE EDDY COUNTY TO  
KIOWA 345-KV TRANSMISSION LINE AND  
ASSOCIATED FACILITIES; (2) APPROVAL  
OF THE LOCATION OF THE 345-KV  
TRANSMISSION LINE AND ASSOCIATED  
FACILITIES; (3) DETERMINATION OF  
RIGHT-OF-WAY WIDTH FOR THE  
TRANSMISSION LINE; AND (4)  
AUTHORIZATION TO ACCRUE AN  
ALLOWANCE FOR FUNDS USED DURING  
CONSTRUCTION FOR THE TRANSMISSION  
LINE AND ASSOCIATED FACILITIES,  
  
SOUTHWESTERN PUBLIC SERVICE  
COMPANY,  
  
APPLICANT.

In accordance with New Mexico Public Regulation Commission (“Commission”) Rule 1.2.2.37(G)(2) NMAC, Southwestern Public Service Company (“SPS”) files this Errata Notice to correct an error identified in the Direct Testimony of Jarred C. Cooley. Specifically, at page 20, line 7, there is an error in the illustrative projection of the estimated cost of the proposed Eddy County to Kiowa 345-kV transmission line and associated facilities that would be allocated to SPS’s New Mexico retail customers. Mr. Cooley incorrectly states that SPS’s New Mexico retail customers would be allocated 2.03% or approximately \$2.14 million. However, 2.03%<sup>1</sup> of the

<sup>1</sup> Percentage calculated based on New Mexico jurisdictional allocation and the SPP's Highway/Byway cost allocation methodology.

estimated \$60.8 million total cost is approximately \$1.23 million – not \$2.14 million as shown in Mr. Cooley’s testimony.

In addition to this error, Commission Utility Division Staff’s (“Staff”) requested that SPS include SPS witness Jerry G. Crawford’s New Mexico Professional Engineer seal/stamp and signature on pages 2-4 of Attachment JGC-1 (Required Right of Way Width analysis). For completeness, all four pages of Attachment JGC-1 will be replaced to reflect Mr. Crawford’s seal and signature as of June 6, 2019.

By this Errata Notice, SPS is attaching replacement pages reflecting the correction to Mr. Cooley’s direct testimony and the updated Attachment JGC-1 to Mr. Crawford’s direct testimony as Exhibit A. SPS is providing both a legislatively formatted (*i.e.*, red-lined) and clean version of the corrected pages, and is serving a copy of the Errata Notice on the Commission’s Utility Division Staff and all parties listed on the certificate of service in this case so that the corrected pages can be inserted in the original filing and service copies.

Respectfully submitted,

HINKLE SHANOR LLP  
Jeffrey L. Fornaciari

ATTORNEYS FOR SOUTHWESTERN PUBLIC  
SERVICE COMPANY

# **EXHIBIT A**

Case No. 19-\_\_\_\_-UT  
Direct Testimony  
of  
Jarred J. Cooley

1 For illustrative purposes, using the jurisdictional allocators filed in SPS's most  
2 recent New Mexico retail base rate case (Case No. 17-00255-UT), approximately  
3 18% of SPS's total company costs would be allocated to New Mexico retail, 46%  
4 to Texas retail customers, and 36% to SPS's wholesale customers.

5 Under this illustrative projection, SPS's New Mexico retail customers  
6 would be responsible for approximately 2.03% of the estimated \$60.8 million  
7 total cost (approximately \$~~1.232~~.14 million) for the Proposed Project (i.e., 18% of  
8 11.29% of the total estimated cost allocated to SPS). The actual allocated amount  
9 in future SPS New Mexico retail rate cases will differ from this estimated amount  
10 and will depend upon final actual costs for the Proposed Project, the SPP funding  
11 allocation, and the jurisdictional allocations used in a future rate case.

12 **Q. Does this conclude your pre-filed testimony?**

13 A. Yes.

Case No. 19-\_\_\_\_-UT  
Direct Testimony  
of  
Jarred J. Cooley

1 For illustrative purposes, using the jurisdictional allocators filed in SPS's most  
2 recent New Mexico retail base rate case (Case No. 17-00255-UT), approximately  
3 18% of SPS's total company costs would be allocated to New Mexico retail, 46%  
4 to Texas retail customers, and 36% to SPS's wholesale customers.

5 Under this illustrative projection, SPS's New Mexico retail customers  
6 would be responsible for approximately 2.03% of the estimated \$60.8 million  
7 total cost (approximately \$1.23 million) for the Proposed Project (i.e., 18% of  
8 11.29% of the total estimated cost allocated to SPS). The actual allocated amount  
9 in future SPS New Mexico retail rate cases will differ from this estimated amount  
10 and will depend upon final actual costs for the Proposed Project, the SPP funding  
11 allocation, and the jurisdictional allocations used in a future rate case.

12 **Q. Does this conclude your pre-filed testimony?**

13 A. Yes.

## REQUIRED RIGHT OF WAY WIDTH

Project Name: J24 Eddy County to Kiowa  
Project Engineer: Jerry G. Crawford P.E.

Date: March 12, 2019

Structure Disc: H-Frame Tangent Structures

Conductor: 795 MCM ACSS Drake  
Diameter (in): 1.108  
Weight (lb/ft): 1.093

Insulator Length (ft): 13.3125  
Wind/Weight Span Ratio: 1.0

## Wind Loading Conditions

6 psf (48.4 mph) @ 60 Deg. F <sup>(1)</sup>

Extreme Wind 90 mph (20.74 psf) @ 60 Deg. F <sup>(2)</sup>

Conductor Swing = 26.87 Degrees 48.4 MPH Wind 6.00 psf  
Conductor Swing = 60.29 Degrees 90 MPH Wind 20.74 psf

Insulator Swing = 26.87 Degrees 48.4 MPH Wind 6.00 psf  
Insulator Swing = 60.29 Degrees 90 MPH Wind 20.74 psf

## Notes:

(1) Per NESC Section 234A2

(2) Per NESC Section 250C

(3) Required height to supporting arm of top or critical phase for horizontal clearance at at maximum span length under loading condition

(4) Structure type being considered

(5) Structure deflections are based on the % entered and the height (Ht.)

(6) Electrical clearance under 6 psf wind case (48.4 mph) based on NESC Rule 234A2 plus Xcel Energy design buffer

Electrical clearance under the Extreme Wind case should provide enough air gap space to withstand 60-HZ flashover

(7) + Indicates limiting condition

PLS-CADD Version 15.30x64 4:52:56 PM Tuesday, March 12, 2019  
Xcel Energy  
Project Name: 'C:\Users\Public\Documents\PLS\pls\_cadd\examples\projects\J24\_ROW\_Study.don'

Criteria Notes:

XCEL ENERGY PLS-CADD Criteria File (.cri) Version 2

\*\*\*Version History\*\*\*

06/28/2018 Version 0 - Initial version for general review  
07/27/2018 Version 1 - First release version (updated insulator swing criteria)  
01/05/2019 Version 2 - Added insulator swing weather cases for PSC Front Range Wind Speeds

\*\*\*This criteria file is based on XCEL ENERGY Design Criteria as outlined in the following documents\*\*\*

- \*\*\*\* XEL-STD-TRANSMISSION LINE STRUCTURAL LOADING CRITERIA, Version 1.2
- \*\*\*\* XEL-STD-TRANSMISSION LINE CLEARANCE CRITERIA, Version 2.2
- \*\*\*\* XEL-STD-DESIGN GUIDE FOR TRANSMISSION LINE CONDUCTOR, Version 1.0
- \*\*\*\* XEL-STD-CRITERIA FOR END & DESIGN FOR FOUNDATION DEFLECTION AND ROTATION DESIGN, Version 2.0
- \*\*\*\* XEL-STD-DESIGN GUIDE FOR TRANSMISSION LINE INSULATORS, Version 2.0
- \*\*\*\* XEL-POL-FACILITY RATING METHODOLOGY, Version 10.1

Section Sagging Data
