Dear Landowner:

Southwestern Public Service Company ("SPS") is proposing to build a 345-kV transmission line that may affect property that you own. SPS has been working on the routing of this transmission line for several months and has held open house meetings to inform landowners about this project. Since these open house meetings were held, SPS has determined that additional routing segments are needed for the proposed project to increase the number of potential routes. Your land has been identified as being potentially affected by one or more of these new segments.

Enclosed is a map showing the new proposed segments and the segments originally proposed at the landowner meetings. Please review these new proposed segments on or near your property and call me if you have any questions or concerns or if you would like to meet with an SPS representative. My phone number is 806-378-2435.

Thank you very much for your assistance with this important matter.

Sincerely,

A handwritten signature in black ink that reads 'Lance Kenedy' in a cursive script.
