Dear Landowner:

Application of Southwestern Public Service Company to Amend a Certificate of Convenience and Necessity for a Proposed 345-kV Transmission Line Within Yoakum and Gaines Counties, Texas

PUBLIC UTILITY COMMISSION OF TEXAS DOCKET NO. 44726

Southwestern Public Service Company (SPS), a subsidiary of Xcel Energy Inc., is providing notice of its application to amend its Certificate of Convenience and Necessity (CCN) in order to construct and operate a new 345-kilovolt (kV) single-circuit transmission line within Yoakum and Gaines Counties, Texas and certain upgrades described below (Proposed Project). SPS has filed an application with the Public Utility Commission of Texas (Commission or PUC) (Docket No. 44726 - ***Application of Southwestern Public Service Company to Amend a Certificate of Convenience and Necessity for a Proposed 345-kV Transmission Line Within Yoakum and Gaines Counties, Texas***) and is requesting the approval of the Commission for the Proposed Project. The Proposed Project is needed for reliability purposes associated with increased SPS network loads.

The Proposed Project will involve the construction of a new 345-kV transmission line that will begin at the existing Yoakum County Substation located in Yoakum County, approximately six miles southeast of the city of Plains, and will extend generally southwest until it reaches the Texas State Line in either Yoakum County or Gaines County, depending on the route selected. The Yoakum County Substation will be expanded and will require upgrades including the addition of a 345/230-kV, 560 MVA transformer and a 345-kV bus that will accommodate the connection of the 345-kV transmission line. This Proposed Project represents the Texas portion of the Yoakum to Hobbs Project, which is part of a larger TUCO to Yoakum to Hobbs Project. The Southwest Power Pool ("SPP") identified the Proposed Project as needed for reliability to alleviate loading violations on the underlying network and voltage violations due to insufficient power supply to network load additions. The SPP has issued a Notification to Construct for the Proposed Project.

The proposed 345-kV single-circuit transmission line will be constructed using primarily two-pole H-frame steel structures for tangents and light angles. High angle structures and dead-end structures will be three-pole steel structures. The proposed 345-kV single-circuit transmission line will be constructed entirely on new right-of-way with a proposed permanent easement width of 150 feet. In some

circumstances, a wider easement may be necessary, however these locations and easement widths cannot be determined until the selected route is surveyed. In addition to the permanent easement, for construction purposes, SPS proposes a temporary easement of 50-feet with a 300 ft. x 300 ft. temporary easement for angles greater than 45 degrees.

The proposed 345-kV single-circuit transmission line is presented with 13 alternative routes consisting of a combined 40 links and is estimated to be approximately 20 to 48 miles depending on which route is selected.

Depending on the route chosen, the total cost of the Proposed Project, including the transmission line and substation costs, is estimated to be between approximately \$35.4 million and \$70.0 million.

Your land may be directly affected in this docket. If one of SPS's routes is approved by the PUC, SPS will have the right to build a facility, which may directly affect your land. This docket will not determine the value of your land or the value of an easement if one is needed by SPS to build the facility. If you have questions about the transmission line you may contact Lance Kenedy at 806-378-2435 or James Bagley at 806-378-2868. A map of SPS's proposed routes is included with this letter, along with a written description of the links that comprise the proposed routes. Larger, more detailed routing maps may be viewed at SPS's offices at Chase Tower, 600 S. Tyler Street, Suite 1800, Amarillo, Texas, 79101. Information about the proposed project is also accessible on Xcel Energy's website *Power for the Plains* at <http://www.powerfortheplains.com>.

All routes and route links included in this notice are available for selection and approval by the Public Utility Commission of Texas.

The PUC has a brochure entitled "Landowners and Transmission Line Cases at the PUC" that provides basic information about how you may participate in this docket, and how you may contact the PUC. Please read this brochure carefully. The brochure includes sample forms for making comments and for making a request to intervene as a party in this docket. Copies of the brochure are enclosed and are also available from Lance Kenedy at 806-378-2435 or may be downloaded from the PUC's website at <http://www.puc.texas.gov/>. ***The only way to fully participate in the PUC's decision on where to locate the transmission line is to intervene in the docket. It is important for an affected person to intervene because the utility is not obligated to keep affected persons informed of the PUC's proceedings and cannot predict which route may or may not be approved by the PUC.***

In addition to the contacts listed in the brochure, you may call the PUC's Customer Assistance Hotline at 888-782-8477. Hearing- and speech-impaired individuals with text telephones (TTY) may contact the PUC's Customer Assistance Hotline at 512-936-7136 or toll free at 800-735-2989. If you wish to participate in this proceeding by becoming an intervenor, the deadline for intervention in the proceeding is August 10, 2015, and the PUC should receive a letter from you requesting intervention by that date. Mail the request for intervention and 10 copies of the request to:

Public Utility Commission of Texas
Central Records
Attn: Filing Clerk
1701 N. Congress Ave.
P.O. Box 13326
Austin, Texas 78711-3326

Persons who wish to intervene in the docket must also mail a copy of their request for intervention to all parties in the docket and all persons that have pending motions to intervene, at or before the time the

request for intervention is mailed to the PUC. In addition to the intervention deadline, other important deadlines may already exist that affect your participation in this docket. You should review the orders and other filings already made in the docket. The enclosed brochure explains how you can access these filings.

Sincerely,

A handwritten signature in black ink, reading "Sean L. Frederiksen". The signature is written in a cursive, flowing style.

Southwestern Public Service Company (SPS) a subsidiary of Xcel Energy Inc. (Xcel) has filed an application with the Public Utility Commission of Texas (PUC) to amend its Certificate of Convenience and Necessity (CCN) to construct the proposed Yoakum to Texas State Line 345-kV transmission line. Various combinations of transmission line links form routing options for the project. The links forming those routing options are described below.

LINK 001

Link 001 begins at the eastern edge of the existing Yoakum Substation, located approximately 0.94 mile west-northwest of the intersection of CR 260 and FM 435, in the southwest corner of Section 551. The link runs east for approximately 0.04 mile north of an existing 115-kV transmission line and CR 260 before it reaches the link's intersection with Links 002, 005 and 003, located approximately 0.87 mile west-northwest of the intersection of CR 260 and FM 435, in the southwest corner of Section 551.

LINK 002

Link 002 begins at the intersection with Links 001, 003 and 005, located approximately 0.87 mile west-northwest of the intersection of CR 260 and FM 435, in the southwest corner of Section 551. The link runs north for approximately 0.06 mile. The link then turns northwest for approximately 0.12 mile. The link then turns north and proceeds for approximately 0.85 mile parallel to the east side of existing 230-kV and double circuit 115/230-kV existing transmission lines, along the western boundary of Section 551 and into Section 506 before it reaches the link's intersection with Link 010, located approximately 1.41 miles northwest of the intersection of CR 260 and FM 435, in the southwest corner of Section 506.

LINK 003

Link 003 begins at the intersection with Links 001, 002 and 005, located approximately 0.87 mile west-northwest of the intersection of CR 260 and FM 435, in the southwest corner of Section 551. The link runs south for approximately 0.06 mile and crosses an existing 115/230-kV double circuit transmission line. The link continues south for approximately 0.05 mile and crosses CR 260 into Section 568 before it reaches the link's intersection with Links 004 and 011, located approximately 0.87 mile west-southwest of the intersection of CR 260 and FM 435, in the northwest corner of Section 568.

LINK 004

Link 004 begins at the intersection with Links 003 and 011, located approximately 0.87 mile west-southwest of the intersection of CR 260 and FM 435, in the northwest corner of Section 568. The link runs south-southwest for approximately 0.95 mile towards the western boundary of Section 568 before it reaches the link's intersection with Links 006 and 012, located approximately 0.98 mile west-northwest of the intersection of CR 270 and FM 435, in the southwest corner of Section 568.

LINK 005

Link 005 begins at the intersection with Links 001, 002 and 003, located approximately 0.87 mile west-northwest of the intersection of CR 260 and FM 435, in the southwest corner of Section 551. The link runs east-southeast for approximately 0.16 mile north of an existing 115/230-kV double circuit transmission line and CR 260. The link then turns east and proceeds for approximately

0.69 mile parallel to the north side of an existing 115/230-kV double circuit transmission line and CR 260 along the southern boundary of Section 551 before it reaches the link's intersection with Link 007, located on the northwest corner of the intersection of CR 260 and FM 435, in the southeast corner of Section 551.

LINK 006

Link 006 begins at the intersection with Links 004 and 012, located approximately 0.98 mile west-northwest of the intersection of CR 270 and FM 435, in the southwest corner of Section 568. The link runs east for approximately 0.96 mile along the southern boundary of Section 568 before it reaches the link's intersection with Links 007 and 008, located on the northwest corner of the intersection of CR 270 and FM 435, in the southeast corner of Section 568.

LINK 007

Link 007 begins at the intersection with Link 005, located on the northwest corner of the intersection of CR 260 and FM 435, in the southeast corner of Section 551. The link runs south for approximately 1.02 miles parallel to the west side of FM 435, crossing an existing 115/230-kV double circuit transmission line and CR 260 into Section 568 before it reaches the link's intersection with Links 006 and 008, located on the northwest corner of the intersection of CR 270 and FM 435, in the southeast corner of Section 568.

LINK 008

Link 008 begins at the intersection with Links 006 and 007, located on the northwest corner of the intersection of CR 270 and FM 435, in the southeast corner of Section 568. The link runs southeast for approximately 0.19 mile, immediately crossing FM 435 and CR 270 into Section 614. The link then turns east for approximately 1.63 miles parallel to the south side of CR 270 and crossing an existing 230-kV transmission line. The link then turns northeast for approximately 0.19 mile crossing CR 270 into Section 566. The link then turns east for approximately 1.00 mile parallel to the north side of CR 270, before it reaches the link's intersection with Link 009, located on the northwest corner of the intersection of CR 415 and CR 270, in the southeast corner of Section 565.

LINK 009

Link 009 begins at the intersection with Link 008, located on the northwest corner of the intersection of CR 415 and CR 270, in the southeast corner of Section 565. The link crosses CR 270 and runs south-southeast for approximately 1.95 miles along the eastern boundary of Section 616 and Section 629 into Section 628 and along the western boundary of Section 628. The link then turns east-southeast and proceeds for approximately 0.51 mile across the southwest corner of Section 628 and into Section 681. The link then turns east and proceeds for approximately 0.46 mile south of and parallel to the northern boundary of Section 681, before reaching the link's intersection with Link 013, located adjacent to the southwestern end of CR 300, in the northeast corner of Section 681.

LINK 010

Link 010 begins at the intersection with Link 002, located approximately 1.41 miles northwest of the intersection of CR 260 and FM 435, in the southwest corner of Section 506. The link runs west, immediately crossing existing 230-kV and double circuit 115/230-kV transmission lines, then proceeding for approximately 4.06 miles parallel to the southern boundary of Section 507, Section 508, Section 509, and Section 510 and into Section 511, crossing an existing 230-kV

transmission line and SH 214. The link then turns and proceeds south for approximately 1.01 miles parallel to the eastern boundary of Section 546, before reaching the link's intersection with Links 011, 014, and 015, located immediately north of CR 260 approximately 1.02 miles west-northwest of the intersection of CR 260 and SH 214, in the southeast corner of Section 546.

LINK 011

Link 011 begins at the intersection with Links 003 and 004, located approximately 0.87 mile west-southwest of the intersection of CR 260 and FM 435, in the northwest corner of Section 568. The link runs west for approximately 2.19 miles parallel to the south side of CR 260 and south of existing 115-kV and 230-kV transmission lines, along the northern boundary of Section 569 and Section 570. The link then crosses an existing 115-kV transmission line into Section 571 and immediately turns northwest for approximately 0.14 mile, crossing CR 260 into Section 548. The link then turns west and continues west for approximately 1.82 miles parallel to the north side of CR 260, along the southern boundary of Section 548, Section 547, and into Section 546, before reaching the link's intersection with Links 010, 014, and 015, located immediately north of CR 260 approximately 1.02 miles west-northwest of the intersection of CR 260 and SH 214, in the southeast corner of Section 546.

LINK 012

Link 012 begins at the intersection with Links 004 and 006, located approximately 0.98 mile west-northwest of the intersection of CR 270 and FM 435, in the southwest corner of Section 568. The link runs south for approximately 0.03 mile parallel to an existing 230-kV transmission line and proceeds south for 1.45 miles parallel to the western boundary of Section 613 and Section 632, crossing CR 280. Approximately halfway into Section 632, the link turns south-southwest for approximately 0.15 mile crossing into Section 633. The link then turns and proceeds south for approximately 0.37 mile parallel to the eastern boundary of Section 633. The link then turns and proceeds west for approximately 2.01 miles parallel to the southern boundary of Section 633, Section 634, and into Section 635, crossing existing 230-kV and 115-kV transmission lines. The link continues west for approximately 2.00 miles parallel to the north side of CR 300 along the southern boundary of Section 635, Section 636, and into Section 637, before reaching the link's intersection with Links 015, 016, and 017, located immediately north of CR 300 approximately 0.48 mile east-northeast of the intersection of CR 295 and CR 300, in the southeast corner of Section 637.

LINK 013

Link 013 begins at the intersection with Link 009, located adjacent to the southwestern end of CR 300, in the northeast corner of Section 681. The link runs south for approximately 2.96 miles parallel to the eastern boundary of Section 681, Section 692 and Section 745, crossing FM 213 and an existing 115-kV transmission line. The link continues south for approximately 4.00 miles parallel to the eastern boundary of Section 745, Section 756, Section 809, Section 820 and Section 873, crossing CR 330 and FM 1939. The link continues south, immediately crossing an existing 230-kV transmission line and proceeding for approximately 0.99 mile parallel to the west side of an existing 230-kV transmission line along the eastern boundary of Section 884. The link continues south for approximately 0.37 mile, immediately crossing an existing double circuit 69-kV transmission line and CR 390. The link then turns west for approximately 0.59 mile and runs along the south boundary of Section 29. The link then turns south, immediately crossing the Yoakum and Gaines County Line, and proceeds for approximately 0.98 mile along the western boundary of Section 22 in Gaines County. The link then turns southwest for approximately 0.14

mile crossing into Section 14. The link then turns south and proceeds for approximately 0.88 mile parallel to the eastern boundary of Section 14 before reaching the link's intersection with Links 025 and 026, located approximately 2.23 miles east-northeast of the intersection of CR 211 and CR 226, in the southeast corner of Section 14.

LINK 014

Link 014 begins at the intersection with Links 010, 011, and 015, located immediately north of CR 260 approximately 1.02 miles west-northwest of the intersection of CR 260 and SH 214, in the southeast corner of Section 546. The link runs west for approximately 2.12 miles parallel to the north side of CR 260 along the southern boundary of Section 546, Section 545, and into Section 544. The link then turns southwest for approximately 0.17 mile crossing CR 260 into Section 575. The link then turns west for approximately 0.56 mile parallel to the south side of CR 260 along the northern boundary of Section 575. The link then turns northwest for approximately 0.16 mile crossing CR 260 and FM 1622 into Section 543. The link then turns west and proceeds for approximately 0.94 mile parallel to the north side of CR 260 along the southern boundary of Section 543. The link then turns southwest for approximately 0.19 mile crossing CR 260 into Section 577. The link then turns west and proceeds for approximately 0.87 mile parallel to the south side of CR 260 along the northern boundary of Section 577, crossing CR 215 into Section 578. The link then turns south and proceeds for approximately 1.00 mile parallel to the west side of CR 215 along the eastern boundary of Section 578 and into Section 603 before reaching the link's intersection with Links 018 and 019, located immediately west of CR 215 approximately 1.00 mile south-southwest of the intersection of CR 260 and CR 215, in the northeast corner of Section 603.

LINK 015

Link 015 begins at the intersection with Links 010, 011, and 014, located immediately north of CR 260 approximately 1.02 miles west-northwest of the intersection of CR 260 and SH 214, in the southeast corner of Section 546. The link runs south for approximately 0.93 mile crossing CR 260 and parallel to the eastern boundary of Section 573. The link turns south-southeast for approximately 0.11 mile and crosses an existing 230-kV transmission line into Section 608. The link then turns south-southwest for approximately 0.11 mile and then the link proceeds south for approximately 1.85 miles parallel to the eastern boundary of Section 608 and Section 637 before reaching the link's intersection with Links 012, 016, and 017, located immediately north of CR 300 approximately 0.48 mile east-northeast of the intersection of CR 295 and CR 300, in the southeast corner of Section 637.

LINK 016

Link 016 begins at the intersection with Links 012, 015, and 017, located immediately north of CR 300 approximately 0.48 mile east-northeast of the intersection of CR 295 and CR 300, in the southeast corner of Section 637. The link runs west for approximately 2.45 miles parallel to the north side of CR 300 along the southern boundary of Section 637, Section 638 and Section 639, crossing CR 295. Approximately half way into Section 639, the link crosses an existing 230-kV transmission line, and then continues west for approximately 0.55 mile parallel to the north side of CR 300 and north of an existing 230-kV transmission line, along the southern boundary of Section 639 and crosses FM 1622. The link continues west for approximately 1.98 miles parallel to and north of an existing 230-kV transmission line, along the southern boundary of Section 640 and Section 641, and into Section 642, until reaching the link's intersection with Links 019 and 020, located approximately 1.00 mile south-southwest of the intersection of CR 215 and CR 280,

in the southeast corner of Section 642.

LINK 017

Link 017 begins at the intersection with Links 012, 015, and 016, located immediately north of CR 300 approximately 0.48 mile east-northeast of the intersection of CR 295 and CR 300, in the southeast corner of Section 637. The link runs south for approximately 1.94 miles parallel to the eastern boundary of Section 672 and Section 701. The link then turns west for approximately 0.20 mile parallel to the north side of CR 320. The link then turns southwest for approximately 0.19 mile crossing CR 320 into Section 736. The link then turns west and proceeds for approximately 0.85 mile parallel to the south side of CR 320 along the northern boundary of Section 736 and Section 735. Less than halfway into Section 735, the link then turns northwest for approximately 0.17 mile crossing CR 320 into Section 702. The link then turns west and proceeds for approximately 0.46 mile parallel to the north side of CR 320. The link then turns southwest for approximately 0.16 mile crossing CR 320 and CR 255 into Section 734. The link then turns west and proceeds for approximately 1.00 mile parallel to the south side of CR 320 along the northern boundary of Section 734, crossing FM 1622 into Section 733. The link continues west for approximately 2.99 miles parallel to the northern boundary of Section 733, Section 732 and Section 731, crossing an existing 230-kV transmission line before crossing CR 195 into Section 730. The link continues west for approximately 2.04 miles parallel to the northern boundary of Section 730 through Section 729 and into Section 728. The link then turns west-northwest for approximately 0.93 miles crossing into Section 709 before reaching the link's intersection with Links 021 and 022, located immediately east of CR 165 approximately 1.00 mile south-southeast of the transition of CR 310 into CR 165, in the southwest corner of Section 709.

LINK 018

Link 018 begins at the intersection with Links 014 and 019, located immediately west of CR 215 approximately 1.00 mile south-southwest of the intersection of CR 260 and CR 215, in the northeast corner of Section 603. The link runs west for approximately 3.97 miles parallel to the northern boundary of Section 603, Section 602, Section 601 and Section 600, crossing CR 175. The link turns south for approximately 1.97 miles parallel to the western boundary of Section 600 and Section 645 before reaching the link's intersection with Links 020, 021, and 034, located approximately 1.05 mile north-northeast of the transition of CR 310 into CR 165, in the southwest corner of Section 645.

LINK 019

Link 019 begins at the intersection with Links 014 and 018, located immediately west of CR 215 approximately 1.00 mile south-southwest of the intersection of CR 260 and CR 215, in the northeast corner of Section 603. The link runs south for approximately 0.99 mile parallel to the west side of CR 215 along the eastern boundary of Section 603. The link continues south for approximately 0.98 mile parallel to the eastern boundary of Section 642 before reaching the link's intersection with Links 016 and 020, located approximately 1.00 mile south-southwest of the intersection of CR 215 and CR 280, in the southeast corner of Section 642.

LINK 020

Link 020 begins at the intersection with Links 016 and 019, located approximately 1.00 mile south-southwest of the intersection of CR 215 and CR 280, in the southeast corner of Section 642. The link runs west for approximately 3.97 miles parallel to the southern boundary of Section 642, Section 643, Section 644 and Section 645 before reaching the link's intersection with Links 018,

021, and 034, located approximately 1.05 miles north-northeast of the transition of CR 310 into CR 165, in the southwest corner of Section 645.

LINK 021

Link 021 begins at the intersection with Links 018, 020, and 034, located approximately 1.05 miles north-northeast of the transition of CR 310 into CR 165, in the southwest corner of Section 645. The link runs south and proceeds for approximately 1.04 mile parallel to the western boundary of Section 664. The link then continues south for approximately 0.94 mile parallel to the east side of CR 165 along the western boundary of Section 709 before reaching the link's intersection with Links 017 and 022, located immediately east of CR 165 approximately 1.00 mile south-southeast of the transition of CR 310 into CR 165, in the southwest corner of Section 709.

LINK 022

Link 022 begins at the intersection with Links 017 and 021, located immediately east of CR 165 approximately 1.00 mile south-southeast of the transition of CR 310 into CR 165, in the southwest corner of Section 709. The link runs south for approximately 1.05 miles parallel to the east side of CR 165 along the western boundary of Section 728 into Section 773 before reaching the link's intersection with Links 023 and 035, located immediately east of CR 165 approximately 1.00 mile north-northeast of the intersection of CR 165 and CR 330, in the northwest corner of Section 773.

LINK 023

Link 023 begins at the intersection with Links 022 and 035, located immediately east of CR 165 approximately 1.00 mile north-northeast of the intersection of CR 165 and CR 330, in the northwest corner of Section 773. The link runs south for approximately 0.43 mile parallel to the east side of CR 165 along the western boundary of Section 773. Approximately halfway into Section 773 the link turns south-southwest for approximately 0.20 mile, immediately crossing CR 165 into Section 774. The link then turns south for approximately 0.56 mile, parallel to the west side of CR 165 and crossing CR 330 into Section 791. The link then turns south-southeast for approximately 0.19 mile, crossing CR 165 into Section 792. The link then turns and proceeds south for approximately 1.64 miles parallel to the east side of CR 165, crossing CR 340, an existing 115-kV transmission line, and CR 350 before reaching the link's intersection with Links 024 and 038, located in the southeast corner of the intersection of CR 165 and CR 350, in the northwest corner of Section 856.

LINK 024

Link 024 begins at the intersection with Links 023 and 038, located in the southeast corner of the intersection of CR 165 and CR 350, in the northwest corner of Section 856. The link runs south-southwest for approximately 0.18 mile to parallel CR 165. The link turns south for 0.80 mile parallel to the east side of CR 165 along the western boundary of Section 856. The link then crosses an existing 230-kV transmission line and continues south for approximately 1.04 miles, parallel to the east side of CR 165 and the western boundary of Section 901, and crosses SH 83 into Section 7. The link then turns east and proceeds for approximately 0.65 mile parallel to the south side of SH 83. The link then turns south and proceeds for approximately 2.32 miles through Section 7, crossing the Yoakum – Gaines County Line into Gaines County, and proceeds along the eastern boundary of Section 1 to CR 228. The link then crosses CR 228 and continues south for approximately 0.49 mile halfway into Section 10 before reaching the link's intersection with

Links 032 and 040, located approximately 1.09 miles east-southeast of the intersection of CR 233/243 and CR 228, along the eastern boundary of Section 10.

LINK 025

Link 025 begins at the intersection with Links 013 and 026, located approximately 2.23 miles east-northeast of the intersection of CR 211 and CR 226, in the southeast corner of Section 14. The link runs west for approximately 4.97 miles parallel to the southern boundary of Section 14, Section 13, Section 12, Section 11, and Section 10, crossing CR 211. The link then turns south for approximately 2.04 miles parallel to the western boundary of Section 9 and Section 308, crossing CR 226 and into the northwestern corner of Section 307 before reaching the link's intersection with Links 027, 028, and 030, located approximately 1.43 miles southeast of the intersection of CR 226 and SH 214, in the northwest corner of Section 307.

LINK 026

Link 026 begins at the intersection with Links 013 and 025, located approximately 2.23 miles east-northeast of the intersection of CR 211 and CR 226, in the southeast corner of Section 14. The link runs south for approximately 2.04 miles parallel to the eastern boundary of Section 5 and Section 240, crossing CR 226, and into Section 239 before reaching the link's intersection with Links 027 and 029, located approximately 0.99 mile north-northwest of the intersection of CR 222 and CR 203, in the northeast corner of Section 239.

LINK 027

Link 027 begins at the intersection with Links 026 and 029, located approximately 0.99 mile north-northwest of the intersection of CR 222 and CR 203, in the northeast corner of Section 239. The link runs west for approximately 2.83 miles parallel to the northern boundary of Section 239, Section 242 and Section 273, crossing CR 211. The link then turns west-southwest for approximately 0.14 mile. The link then turns west-northwest for approximately 0.13 mile into Section 276. The link then turns west and proceeds for approximately 1.87 miles parallel to the northern boundary of Section 276 and Section 307 before reaching the link's intersection with Links 025, 028, and 030, located approximately 1.43 miles southeast of the intersection of CR 226 and SH 214, in the northwest corner of Section 307.

LINK 028

Link 028 begins at the intersection with Links 025, 027, and 030, located approximately 1.43 miles southeast of the intersection of CR 226 and SH 214, in the northwest corner of Section 307. The link runs west for approximately 2.34 miles parallel to the north boundary of Section 310 through Section 343 and into Section 346, crossing an existing double circuit 69/115-kV transmission line, SH 214, and an existing 115-kV transmission line. The link then turns west-northwest for approximately 0.17 mile into Section 345. The link then turns west-southwest for approximately 0.21 mile into Section 346. The link then turns west and proceeds for approximately 2.31 miles parallel to the northern boundary of Section 346 through Section 382 and into Section 416, crossing CR 223 and CR 225. The link then turns north and proceeds for approximately 0.99 mile parallel to the eastern boundary of Section 417. The link then turns west and proceeds for approximately 3.84 miles parallel to the south side of FM 2055/CR 226 along the northern boundary of Section 417, Section 418, Section 455 and Section 456. The link continues west for approximately 0.15 mile, crossing FM 2055/CR 226 and an existing 69-kV transmission line into Section 494. The link continues west for approximately 1.00 mile parallel to the south side of CR 226 and into Section 495. The link continues west for approximately 1.72

miles parallel to the north boundary of Section 495 and through Section 32, before reaching the link's intersection with Link 032, located approximately 1.38 miles northeast of the intersection of CR 243 and FM 1757, along the western boundary of Section 32.

LINK 029

Link 029 begins at the intersection with Links 026 and 027, located approximately 0.99 mile north-northwest of the intersection of CR 222 and CR 203, in the northeast corner of Section 239. The link runs south for approximately 0.99 mile parallel to the eastern boundary of Section 239. The link crosses CR 222 and continues south for approximately 3.01 miles parallel to the west side of CR 203 along the eastern boundary of Section 238, Section 237, and Section 236. The link continues south for approximately 1.03 miles, crossing CR 216 and proceeding parallel to the eastern boundary of Section 235 and into Section 234. The link then turns west and proceeds for approximately 4.97 miles parallel to the northern boundary of Section 234, Section 247, Section 268, Section 281 and Section 302, crossing CR 211 and SH 214 before reaching the link's intersection with Links 030 and 031, located approximately 1.42 miles northeast of the intersection of CR 219 and CR 212, in the northwest corner of Section 302.

LINK 030

Link 030 begins at the intersection with Links 025, 027, and 028, located approximately 1.43 miles southeast of the intersection of CR 226 and SH 214, in the northwest corner of Section 307. The link runs south for approximately 5.02 miles parallel to the western boundary of Section 307 through Section 303 and into Section 302, crossing CR 222, SH 214, and CR 218 before reaching the link's intersection with Links 029 and 031, located approximately 1.42 miles northeast of the intersection of CR 219 and CR 212, in the northwest corner of Section 302.

LINK 031

Link 031 begins at the intersection with Links 029 and 030, located approximately 1.42 miles northeast of the intersection of CR 219 and CR 212, in the northwest corner of Section 302. The link runs west for approximately 1.21 miles parallel to the northern boundary of Section 315, crossing existing 69-kV and 115-kV transmission lines, and CR 219 into Section 338. The link then turns west-northwest for approximately 0.19 mile into Section 339. The link then turns west and proceeds for approximately 4.71 miles parallel to the southern boundary of Section 339 through Section 412 into Section 423, crossing CR 225 and FM 1757. The link turns west-southwest for approximately 0.19 mile into Section 424. The link then turns west and proceeds for approximately 3.72 miles parallel to the northern boundary of Section 424, Section 449, Section 462, and Section 488, crossing CR 231 and an existing 115-kV transmission line. The link then continues west for approximately 0.75 mile, immediately crossing CR 237 and proceeding parallel to the south side of CR 214 along the northern boundary of Section 27. The link then turns west-southwest for approximately 0.18 mile parallel to the south side of CR 214 along the northern boundary of Section 27. The link then turns west and proceeds for approximately 0.88 mile parallel to the south side of CR 214 along the northern boundary of Section 27 and into Section 20 before reaching the link's intersection with Link 041, located approximately 2.00 miles east-southeast of the intersection of CR 214 and FM 3306, in the northeast corner of Section 20.

LINK 032

Link 032 begins at the intersection with Link 028, located approximately 1.38 miles northeast of the intersection of CR 243 and FM 1757, along the western boundary of Section 32. The link runs

north for approximately 0.40 mile parallel to the western boundary of Section 32. The link then turns north-northwest for approximately 0.19 mile, crossing into Section 10 before reaching the link's intersection with Links 024 and 040, located approximately 1.09 miles southeast of the intersection of CR 233/243 and CR 228, along the eastern boundary of Section 10.

LINK 034

Link 034 begins at the intersection with Links 018, 020, and 021, located approximately 1.05 miles north-northeast of the transition of CR 310 into CR 165, in the southwest corner of Section 645. The link runs west for approximately 1.03 miles parallel to the southern boundary of Section 646, crossing CR 145 into Section 647. The link continues west for approximately 3.14 miles parallel to the southern boundary of Section 647, Section 648, Section 649 and into Section 650, crossing CR 125 before reaching the Texas/New Mexico State Line, located on State Line Rd. approximately 0.57 miles south of the intersection of State Line Rd. and US 82, near the southwest corner of Section 650.

LINK 035

Link 035 begins at the intersection with Links 022 and 023, located immediately east of CR 165 approximately 1.00 mile north-northeast of the intersection of CR 165 and CR 330, in the northwest corner of Section 773. The link immediately crosses CR 165 and runs west for approximately 3.01 miles parallel to the northern boundary of Section 773 through Section 776 before reaching the link's intersection with Links 036 and 037, located approximately 1.58 miles northeast of the intersection of CR 330 and State Line Rd., in the northwest corner of Section 776.

LINK 036

Link 036 begins at the intersection with Links 035 and 037, located approximately 1.58 miles northeast of the intersection of CR 330 and State Line Rd., in the northwest corner of Section 776. The link runs west for approximately 0.33 mile parallel to the northern boundary of Section 777. The link then turns northwest for approximately 0.19 mile into Section 724. The link then turns southwest for approximately 0.19 mile into Section 777. The link then turns west and proceeds approximately 0.54 mile before reaching the Texas/New Mexico State Line, located on State Line Rd. approximately 0.99 mile north of the intersection of CR 330 and State Line Rd., near the northwest corner of Section 778.

LINK 037

Link 037 begins at the intersection with Links 035 and 036, located approximately 1.58 miles northeast of the intersection of CR 330 and State Line Rd., in the northwest corner of Section 776. The link runs south for approximately 1.98 miles parallel to the western boundary of Section 776 and Section 789, crossing CR 330. The link continues south for approximately 1.03 miles crossing into Section 840 and running parallel on the east side of an existing 69-kV transmission line along the western boundary of Section 840, crossing an existing 115-kV transmission line and CR 350 into Section 853 before reaching the link's intersection with Links 038 and 039, located immediately south of CR 350 approximately 1.27 miles east-southeast of the intersection of CR 350 and State Line Rd., in the northwest corner of Section 853.

LINK 038

Link 038 begins at the intersection with Links 023 and 024, located in the southeast corner of the intersection of CR 165 and CR 350, in the northwest corner of Section 856. The link runs west for

approximately 3.02 miles parallel to the south side of CR 350 and south of an existing 115-kV transmission line along the northern boundary of Section 856 through Section 853, before reaching the link's intersection with Links 037 and 039, located immediately south of CR 350 approximately 1.27 miles east-southeast of the intersection of CR 350 and State Line Rd., in the northwest corner of Section 853.

LINK 039

Link 039 begins at the intersection with Links 037 and 038, located immediately south of CR 350 approximately 1.27 miles east-southeast of the intersection of CR 350 and State Line Rd., in the northwest corner of Section 853. The link runs south for approximately 1.89 miles parallel to the east side of an existing 69-kV transmission line along the western boundary of Section 853 and Section 904, and crosses an existing 230-kV transmission line. The link then turns southwest for approximately 0.18 mile, twice crossing an existing 69-kV transmission line and then crossing SH 83. The link then turns west and proceeds for approximately 1.15 miles immediately crossing an existing 69-kV transmission line and CR 249, proceeding parallel to the south side of SH 83 along the northern boundary of Section 6, before reaching the Texas/New Mexico State Line, located immediately south of the intersection of SH 83 and State Line Rd., near the western boundary of Section 6.

LINK 040

Link 040 begins at the intersection with Links 024 and 032, located approximately 1.09 miles southeast of the intersection of CR 233/243 and CR 228, along the eastern boundary of Section 10. The link runs west for approximately 2.94 miles from the eastern boundary of Section 10, through approximately the center of Section 8 and Section 9, crossing CR 243 and CR 245-1. The link then turns west-southwest for approximately 0.19 mile, crossing CR 247 into Section 7. The link then turns west and proceeds for approximately 1.80 miles through approximately the center of Section 7 and Section 6, crossing CR 249 and an existing 69-kV transmission line before reaching the Texas/New Mexico State Line, located approximately 0.52 mile south of the intersection of the State Line Rd. and CR 228, near the western boundary of Section 6.

LINK 041

Link 041 begins at the intersection with Link 31, located approximately 2.00 miles east-southeast of the intersection of CR 214 and FM 3306, near the northeast corner of Section 20, just south of CR 214. The link runs west-northwest for approximately 0.33 mile parallel to the south side of CR 214 near the northern boundary of Section 20. The link then turns west and proceeds for approximately 1.83 miles parallel to the south side of CR 214 along the northern boundary of Section 20 and Section 19, crossing FM 3306 and an existing 69-kV transmission line into Section 18. The link then turns northwest for approximately 0.16 mile, crossing CR 214 into Section 13. The link then turns west and proceeds for approximately 2.50 miles parallel to the north side of CR 214 along the southern boundary of Section 13, Section 14 and Section 15. The link then turns southwest for approximately 0.10 mile, crossing CR 214 before reaching the Texas/New Mexico State Line, located immediately south of the intersection of State Line Rd. and CR 214, near the northwest corner of Section 16.

Landowners and Transmission Line Cases at the PUC

Public Utility Commission of Texas

1701 N. Congress Avenue
P.O. Box 13326
Austin, Texas 78711-3326
(512) 936-7261
www.puc.state.tx.us

Effective: June 1, 2011

Purpose of This Brochure

This brochure is intended to provide landowners with information about proposed new transmission lines and the Public Utility Commission's ("PUC" or "Commission") process for evaluating these proposals. At the end of the brochure is a list of sources for additional information.

The following topics are covered in this brochure:

- How the PUC evaluates whether a new transmission line should be built,
- How you can participate in the PUC's evaluation of a line, and
- How utilities acquire the right to build a transmission line on private property.

You are receiving the enclosed formal notice because one or more of the routes for a proposed transmission line may require an easement or other property interest across your property, or the centerline of the proposed project may come within 300 feet of a house or other habitable structure on your property. This distance is expanded to 500 feet if the proposed line is greater than 230 kilovolts (kV). For this reason, your property is considered **directly affected land**. This brochure is being included as part of the formal notice process.

If you have questions about the proposed routes for a transmission line, you may contact the applicant. The applicant also has a more detailed map of the proposed routes for the transmission line and nearby habitable structures. The applicant may help you understand the routing of the project and the application approval process in a transmission line case but cannot provide legal advice or represent you. ***The applicant cannot predict which route may or may not be approved by the PUC. The PUC decides which route to use for the transmission line, and the applicant is not obligated to keep you informed of the PUC's proceedings. The only way to fully participate in the PUC's decision on where to locate the transmission line is to intervene, which is discussed below.***

The PUC is sensitive to the impact that transmission lines have on private property. At the same time, transmission lines deliver electricity to millions of homes and businesses in Texas, and new lines are sometimes needed so that customers can obtain reliable, economical power.

The PUC's job is to decide whether a transmission line application should be approved and on which route the line should be constructed. The PUC values input from landowners and encourages you to participate in this process by intervening in the docket.

PUC Transmission Line Case

Texas law provides that most utilities must file an application with the PUC to obtain or amend a Certificate of Convenience and Necessity (CCN) in order to build a new transmission line in Texas. The law requires the PUC to consider a number of factors in deciding whether to approve a proposed new transmission line.

The PUC may approve an application to obtain or amend a CCN for a transmission line after considering the following factors:

- Adequacy of existing service;
- Need for additional service;
- The effect of approving the application on the applicant and any utility serving the proximate area;
- Whether the route utilizes existing compatible rights-of-way, including the use of vacant positions on existing multiple-circuit transmission lines;
- Whether the route parallels existing compatible rights-of-way;
- Whether the route parallels property lines or other natural or cultural features;
- Whether the route conforms with the policy of prudent avoidance (which is defined as the limiting of exposures to electric and magnetic fields that can be avoided with reasonable investments of money and effort); and
- Other factors such as community values, recreational and park areas, historical and aesthetic values, environmental integrity, and the probable improvement of service or lowering of cost to consumers in the area.

If the PUC decides an application should be approved, it will grant to the applicant a CCN or CCN amendment to allow for the construction and operation of the new transmission line.

Application to Obtain or Amend a CCN:

An application to obtain or amend a CCN describes the proposed line and includes a statement from the applicant describing the need for the line and the impact of building it. In addition to the routes proposed by the applicant in its application, the possibility exists that additional routes may be developed, during the course of a CCN case, that could affect property in a different manner than the original routes proposed by the applicant.

The PUC conducts a case to evaluate the impact of the proposed line and to decide which route should be approved. Landowners who would be affected by a new line can:

- informally file a protest, or
- formally participate in the case as an intervenor.

Filing a Protest (informal comments):

If you do not wish to intervene and participate in a hearing in a CCN case, you may file **comments**. An individual or business or a group who files only comments for or against any aspect of the transmission line application is considered a “protestor.”

Protestors make a written or verbal statement in support of or in opposition to the utility’s application and give information to the PUC staff that they believe supports their position.

Protestors are **not** parties to the case, however, and do not have the right to:

- Obtain facts about the case from other parties;
- Receive notice of a hearing, or copies of testimony and other documents that are filed in the case;
- Receive notice of the time and place for negotiations;
- File testimony and/or cross-examine witnesses;
- Submit evidence at the hearing; or
- Appeal P.U.C. decisions to the courts.

If you want to make comments, you may either send written comments stating your position, or you may make a statement on the first day of the hearing. If you have not intervened, however, you will not be able to participate as a party in the hearing. Only parties may submit evidence and ***the PUC must base its decision on the evidence.***

Intervening in a Case:

To become an intervenor, you must file a statement with the PUC, no later than the date specified in the notice letter sent to you with this brochure, requesting intervenor status (also referred to as a party). This statement should describe how the proposed transmission line would affect your property. Typically, intervention is granted only to directly affected landowners. However, any landowner may request to intervene and obtain a ruling on his or her specific fact situation and concerns. A sample form for intervention and the filing address are attached to this brochure, and may be used to make your filing. A letter requesting intervention may also be used in lieu of the sample form for intervention.

If you decide to intervene and become a party in a case, you will be required to follow certain procedural rules:

- You are required to timely respond to requests for information from other parties who seek information.
- If you file testimony, you must appear at a hearing to be cross-examined.
- If you file testimony or any letters or other documents in the case, you must send copies of the documents to every party in the case and you must file multiple copies with the PUC.
- If you intend to participate at the hearing and you do not file testimony, you must at least file a statement of position, which is a document that describes your position in the case.
- Failure to comply with these procedural rules may serve as grounds for you to be dismissed as an intervenor in the case.
- If you wish to participate in the proceedings it is very important to attend any prehearing conferences.

Intervenors may represent themselves or have an attorney to represent them in a CCN case. If you intervene in a case, you may want an attorney to help you understand the PUC’s procedures and the laws and rules that the PUC applies in deciding whether to approve a transmission line. The PUC encourages landowners to intervene and become parties.

Stages of a CCN Case:

If there are persons who intervene in the case and oppose the approval of the line, the PUC may refer the case to an administrative law judge (ALJ) at the State Office of Administrative Hearings (SOAH) to conduct a hearing, or the Commission may elect to conduct a hearing itself. The hearing is a formal proceeding, much like a trial, in which testimony is presented. In the event the case is referred to SOAH, the ALJ makes a recommendation to the PUC on whether the application should be approved and where and how the line should be routed.

There are several stages of a CCN case:

- The ALJ holds a prehearing conference (usually in Austin) to set a schedule for the case.
- Parties to the case have the opportunity to conduct discovery; that is, obtain facts about the case from other parties.
- A hearing is held (usually in Austin), and parties have an opportunity to cross-examine the witnesses.
- Parties file written testimony before the date of the hearing. Parties that do not file written testimony or statements of position by the deadline established by the ALJ may not be allowed to participate in the hearing on the merits.
- Parties may file written briefs concerning the evidence presented at the hearing, but are not required to do so.
- In deciding where to locate the transmission line and other issues presented by the application, the ALJ and Commission rely on factual information submitted as evidence at the hearing by the parties in the case. In order to submit factual information as evidence (other than through cross-examination of other parties' witnesses), a party must have intervened in the docket and filed written testimony on or before the deadline set by the ALJ.
- The ALJ makes a recommendation, called a **proposal for decision**, to the Commission regarding the case. Parties who disagree with the ALJ's recommendation may file exceptions.
- The Commissioners discuss the case and decide whether to approve the application. The Commission may approve the ALJ's recommendation, approve it with specified changes, send the case back to the ALJ for further consideration, or deny the application. The written decision rendered by the Commission is called a **final order**. Parties who believe that the Commission's decision is in error may file motions for rehearing, asking the Commission to reconsider the decision.
- After the Commission rule on the motion for rehearing, parties have the right to appeal the decision to district court in Travis County.
-

Right to Use Private Property

The Commission is responsible for deciding whether to approve a CCN application for a proposed transmission line. If a transmission line route is approved that impacts your property, the electric utility must obtain the right from you to enter your property and to build, operate, and maintain the transmission line. This right is typically called an easement.

Utilities may buy easements through a negotiated agreement, but they also have the power of eminent domain (condemnation) under Texas law. Local courts, not the PUC, decide issues concerning easements for rights-of-way. The PUC does not determine the value of property.

The PUC final order in a transmission case normally requires a utility to take certain steps to minimize the impact of the new transmission line on landowners' property and on the environment. For example, the order normally requires steps to minimize the possibility of erosion during construction and maintenance activities.

HOW TO OBTAIN MORE INFORMATION

The PUC's online filings interchange on the PUC website provides free access to documents that are filed with the Commission in Central Records. The docket number, also called a control number on the PUC website, of a case is a key piece of information used in locating documents in the case. You may access the Interchange by visiting the PUC's website home page at www.puc.state.tx.us and navigate the website as follows:

- Select "Filings."
- Select "Filings Search."
- Select "Filings Search."
- Enter 5-digit Control (Docket) Number. *No other information is necessary.*
- Select "Search." *All of the filings in the docket will appear in order of date filed.*
- Scroll down to select desired filing.
- Click on a blue "Item" number at left.
- Click on a "Download" icon at left.

Documents may also be purchased from and filed in Central Records. For more information on how to purchase or file documents, call Central Records at the PUC at 512-936-7180.

PUC Substantive Rule 25.101, Certification Criteria, addresses transmission line CCNs and is available on the PUC's website, or you may obtain copies of PUC rules from Central Records.

Always include the docket number on all filings with the PUC. You can find the docket number on the enclosed formal notice. Send documents to the PUC at the following address.

Public Utility Commission of Texas
Central Records
Attn: Filing Clerk
1701 N. Congress Avenue
P.O. Box 13326
Austin, TX 78711-3326

The information contained within this brochure is not intended to provide a comprehensive guide to landowner rights and responsibilities in transmission line cases at the PUC. This brochure should neither be regarded as legal advice nor should it be a substitute for the PUC's rules. However, if you have questions about the process in transmission line cases, you may call the PUC's Legal Division at 512-936-7261. The PUC's Legal Division may help you understand the process in a transmission line case but cannot provide legal advice or represent you in a case. You may choose to hire an attorney to decide whether to intervene in a transmission line case, and an attorney may represent you if you choose to intervene.

Communicating with Decision-Makers

Do not contact the ALJ or the Commissioners by telephone or email. They are not allowed to discuss pending cases with you. They may make their recommendations and decisions only by relying on the evidence, written pleadings, and arguments that are presented in the case.

Request to Intervene in PUC Docket No. _____

Attachment 10
Page 19 of 43

The following information must be submitted by the person requesting to intervene in this proceeding. This completed form will be provided to all parties in this docket. **If you DO NOT want to be an intervenor, but still want to file comments, please complete the "Comments" page.**

Mail this completed form and 10 copies to:

Public Utility Commission of Texas
Central Records
Attn: Filing Clerk
1701 N. Congress Ave.
P.O. Box 13326
Austin, TX 78711-3326

First Name: _____ Last Name: _____

Phone Number: _____ Fax Number: _____

Address, City, State: _____

I am requesting to intervene in this proceeding. As an INTERVENOR, I understand the following:

- I am a party to the case;
- I am required to respond to all discovery requests from other parties in the case;
- If I file testimony, I may be cross-examined in the hearing;
- If I file any documents in the case, I will have to provide a copy of that document to every other party in the case; and
- I acknowledge that I am bound by the Procedural Rules of the Public Utility Commission of Texas (PUC) and the State Office of Administrative Hearings (SOAH).

Please check one of the following:

- ☐ I own property with a habitable structure located near one or more of the utility's proposed routes for a transmission line.
- ☐ One or more of the utility's proposed routes would cross my property.
- ☐ Other. Please describe and provide comments. You may attach a separate page, if necessary. _____

Signature of person requesting intervention:

_____ Date: _____

Comments in Docket No. _____

If you want to be a PROTESTOR only, please complete this form. Although public comments are not treated as evidence, they help inform the PUC and its staff of the public concerns and identify issues to be explored. The PUC welcomes such participation in its proceedings.

Mail this completed form and 10 copies to:

Public Utility Commission of Texas
Central Records
Attn: Filing Clerk
1701 N. Congress Ave.
P.O. Box 13326
Austin, TX 78711-3326

First Name: _____ Last Name: _____

Phone Number: _____ Fax Number: _____

Address, City, State: _____

I am NOT requesting to intervene in this proceeding. As a PROTESTOR, I understand the following:

- I am NOT a party to this case;
- My comments are not considered evidence in this case; and
- I have no further obligation to participate in the proceeding.

Please check one of the following:

- ☐ I own property with a habitable structure located near one or more of the utility's proposed routes for a transmission line.
- ☐ One or more of the utility's proposed routes would cross my property.
- ☐ Other. Please describe and provide comments. You may attach a separate page, if necessary. _____

Signature of person submitting comments:

THE STATE OF TEXAS
LANDOWNER'S
BILL OF RIGHTS

PREPARED BY THE

OFFICE OF THE
ATTORNEY GENERAL OF TEXAS

STATE OF TEXAS LANDOWNER'S BILL OF RIGHTS

This Landowner's Bill of Rights applies to any attempt by the government or a private entity to take your property. The contents of this Bill of Rights are prescribed by the Texas Legislature in Texas Government Code Sec. 402.031 and Chapter 21 of the Texas Property Code.

1. You are entitled to receive adequate compensation if your property is taken for a public use.
2. Your property can only be taken for a public use.
3. Your property can only be taken by a governmental entity or private entity authorized by law to do so.
4. The entity that wants to take your property must notify you that it wants to take your property.
5. The entity proposing to take your property must provide you with a written appraisal from a certified appraiser detailing the adequate compensation you are owed for your property.
6. The entity proposing to take your property must make a bona fide offer to buy the property before it files a lawsuit to condemn the property – which means the condemning entity must make a good faith offer that conforms with Chapter 21 of the Texas Property Code.
7. You may hire an appraiser or other professional to determine the value of your property or to assist you in any condemnation proceeding.
8. You may hire an attorney to negotiate with the condemning entity and to represent you in any legal proceedings involving the condemnation.
9. Before your property is condemned, you are entitled to a hearing before a court appointed panel that includes three special commissioners. The special commissioners must determine the amount of compensation the condemning entity owes for the taking of your property. The commissioners must also determine what compensation, if any, you are entitled to receive for any reduction in value of your remaining property.
10. If you are unsatisfied with the compensation awarded by the special commissioners, or if you question whether the taking of your property was proper, you have the right to a trial by a judge or jury. If you are dissatisfied with the trial court's judgment, you may appeal that decision.

CONDEMNATION PROCEDURE

Eminent domain is the legal authority that certain entities are granted that allows those entities to take private property for a public use. Private property can include land and certain improvements that are on that property.

Private property may only be taken by a governmental entity or private entity that is authorized by law to do so. Your property may be taken only for a public purpose. That means it can only be taken for a purpose or use that serves the general public. Texas law prohibits condemnation authorities from taking your property to enhance tax revenues or foster economic development.

Your property cannot be taken without adequate compensation. Adequate compensation includes the market value of the property being taken. It may also include certain damages if your remaining property's market value is diminished by the acquisition itself or by the way the condemning entity will use the property.

HOW THE TAKING PROCESS BEGINS

The taking of private property by eminent domain must follow certain procedures. First, the entity that wants to condemn your property must provide you a copy of this Landowner's Bill of Rights before - or at the same time - the entity first represents to you that it possesses eminent domain authority.

Second, if it has not been previously provided, the condemning entity must send this Landowner's Bill of Rights to the last known address of the person who is listed as the property owner on the most recent tax roll. This requirement stipulates that the Landowner's Bill of Rights must be provided to the property owner at least seven days before the entity makes a final offer to acquire the property.

Third, the condemning entity must make a bona fide offer to purchase the property. The requirements for a bona fide offer are contained in Chapter 21 of the Texas Property Code. At the time a purchase offer is made, the condemning entity must disclose any appraisal reports it produced or acquired that relate specifically to the property and were prepared in the ten years preceding the date of the purchase offer. You have the right to discuss the offer with others and to either accept or reject the offer made by the condemning entity.

CONDEMNATION PROCEEDINGS

If you and the condemning entity do not agree on the value of your property, the entity may begin condemnation proceedings. Condemnation is the legal process that eligible entities utilize to take private property. It begins with a condemning entity filing a claim for your property in court. If you live in a county where part of the property being condemned is located, the claim must be filed in that county. Otherwise, the condemnation claim can be filed in any county where at least part of the property being condemned is located. The claim must describe the property being condemned, state with specificity the public use, state the name of the landowner, state that the landowner and the condemning entity were unable to agree on the value of the property, state that the condemning entity provided the landowner with the Landowner's Bill of Rights, and state that the condemning entity made a bona fide offer to acquire the property from the property owner voluntarily.

SPECIAL COMMISSIONERS' HEARING

After the condemning entity files a condemnation claim in court, the judge will appoint three local landowners to serve as special commissioners. The judge will give you a reasonable period to strike one of the special commissioners. If a commissioner is struck, the judge will appoint a replacement. These special commissioners must live in the county where the condemnation proceeding is filed, and they must take an oath to assess the amount of adequate compensation fairly, impartially, and according to the law. The special commissioners are not legally authorized to decide whether the condemnation is necessary or if the public use is proper. Their role is limited to assessing adequate compensation for you. After being appointed, the special commissioners must schedule a hearing at the earliest practical time and place. The special commissioners are also required to give you written notice of the condemnation hearing.

You are required to provide the condemning entity any appraisal reports that were used to determine your claim about adequate compensation for the condemned property. Under a new law enacted in 2011, landowners' appraisal reports must be provided to the condemning entity either ten days after the landowner receives the report or three business days before the special commissioners' hearing - whichever is earlier. You may hire an appraiser or real estate professional to help you determine the value of your private property. Additionally, you can hire an attorney to represent you during condemnation proceedings.

At the condemnation hearing, the special commissioners will consider your evidence on the value of your condemned property, the damages to remaining property, any value added to the remaining property as a result of the condemnation, and the condemning entity's proposed use of your condemned property.

SPECIAL COMMISSIONERS' AWARD

After hearing evidence from all interested parties, the special commissioners will determine the amount of money that you should be awarded to adequately compensate you for your property. The special commissioners' decision is significant to you not only because it determines the amount that qualifies as adequate compensation, but also because it impacts who pays for the cost of the condemnation proceedings. Under the Texas Property Code, if the special commissioners' award is less than or equal to the amount the condemning entity offered to pay before the proceedings began, then you may be financially responsible for the cost of the condemnation proceedings. However, if the special commissioners' award is more than the condemning entity offered to pay before the proceedings began, then the condemning entity will be responsible for the costs associated with the proceedings.

The special commissioners are required to provide the court that appointed them a written decision. That decision is called the "Award." The Award must be filed with the court and the court must send written notice of the Award to all parties. After the Award is filed, the condemning entity may take possession of the property being condemned, even if either party appeals the Award of the special commissioners. To take possession of the property, the condemning entity must either pay the amount of the Award or deposit the amount of the Award into the court's registry. You have the right to withdraw funds that are deposited into the registry of the court.

OBJECTION TO THE SPECIAL COMMISSIONERS' AWARD

If either the landowner or the condemning entity is dissatisfied with the amount of the Award, either party can formally object to the Award. In order to successfully make this valuation objection, it must be filed in writing with the court. If neither party timely objects to the special commissioners' Award, the court will adopt the Award as the final judgment of the court.

If a party timely objects to the special commissioners' Award, the court will hear the case in the same manner that other civil cases are heard. Landowners who object to the Award and ask the court to hear the matter have the right to a trial and can elect whether to have the case decided by a judge or jury. The allocation of any trial costs is decided in the same manner that costs are allocated with the special commissioners' Award. After trial, either party may appeal any judgment entered by the court.

DISMISSAL OF THE CONDEMNATION ACTION

A condemning entity may file a motion to dismiss the condemnation proceeding if it decides it no longer needs your condemned property. If the court grants the motion to dismiss, the case is over and you are entitled to recover reasonable and necessary fees for attorneys, appraisers, photographers, and for other expenses incurred to the date of the hearing on the motion to dismiss.

If you wish to challenge the condemning entity's authority to take your property, you can lodge that challenge by filing a motion to dismiss the condemnation proceeding. Such a motion to dismiss would allege that the condemning entity did not have the right to condemn your property. For example, a landowner could challenge the condemning entity's claim that it seeks to take the property for a public use. If the court grants the landowner's motion, the court may award the landowner reasonable and necessary fees for attorneys, appraisers, photographers, and for other expenses incurred to the date of the hearing or judgment.

RELOCATION COSTS

If you are displaced from your residence or place of business, you may be entitled to reimbursement for reasonable expenses incurred while moving personal property from the residence or relocating the business to a new site. However, during condemnation proceedings, reimbursement for relocation costs may not be available if those costs are separately recoverable under another law. Texas law limits the total amount of available relocation costs to the market value of the property being moved. Further, the law provides that moving costs are limited to the amount that a move would cost if it were within 50 miles.

RECLAMATION OPTIONS

If private property was condemned by a governmental entity, and the public use for which the property was acquired is canceled before that property is used for that public purpose, no actual progress is made toward the public use within ten years or the property becomes unnecessary for public use within ten years, landowners may have the right to repurchase the property for the price paid to the owner by the entity at the time the entity acquired the property through eminent domain.

DISCLAIMER

The information in this statement is intended to be a summary of the applicable portions of Texas state law as required by HB 1495, enacted by the 80th Texas Legislature, Regular Session. This statement is not legal advice and is not a substitute for legal counsel.

ADDITIONAL RESOURCES

Further information regarding the procedures, timelines and requirements outlined in this document can be found in Chapter 21 of the Texas Property Code.
